

Issue 4 * * * * * A Science Fiction Newspaper * * * * * March Issue

GAMES!

In the past few months, there have been many new games that have come out at your local game room. Some of these games are Berserk, a game where you move a man around a room and try to And try to destroy the many robots that try to kill you. The game features talking voices of the robots saying, "Stop the huminoid. Get the intruder!" In Gorf, another game, you get 2 ships for a quarter and 4 ships for 2 quarters. The game is really a mixture of other games (SpaceInvaders, Laser Attack, Galaxians, and Warp). In the game you have to destroy several different fleets of ships and then finally the flagship. Each time you go through the entire game you rise in rank and get a free ship. The ranks are Cadet, Captain, Colonel, General, Warrior, and Avenger. Another game is Phoenix. In Phoenix you have to destroy several fleets of birds and then a large castle. The game also has a force field that stays on for only a few seconds but deflects any bombardment of laser beams from the attackers. Some other exciting video games are Missile Command, Asteroids, Defenders, Firebird, Battlezone, and many others. Space Invaders, Asteroids, and just recently Missile Command are available on Atari Home Computer System cartridges. All of these games cost a quarter, and are at game rooms or any place that has video games. Right now they are the closest thing to being in space and fighting aliens, so go play a video game!!!!!!!!

Atari makes many video games for the home

"THE BATTLE" part 3

About twenty minutes later Max got a report from the navigational room. "Our location is directly over where the disturbance was reported."

As the ship came out of hyperspace they could see a red and blue planet ahead. They moved ahead, unaware they were being watched.

S.F. STORY

WARP
part 4

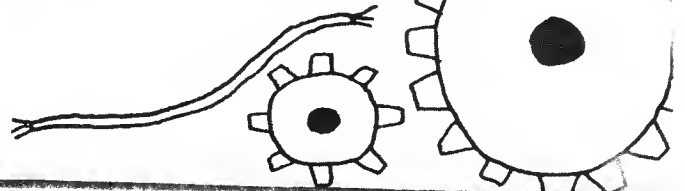

As Alexander had planned, the disturbance he had caused in the computer room had been felt all around the hospital.

In the sub-terminal office on floor number 7, Dr. Fulton was trying to get records on one of his patients. "Nurse, there's something wrong with the computer. Switch the monitor to camera 4 in the computer room."

When these instructions were carried out, the gruesome scene in the computer room was revealed. "Call the police! See if they can get a S.W.A.T. unit out here."

The S.W.A.T. unit arrived and fenced off the entire hospital area. All of a sudden everything around the hospital was enveloped in a bright light and then all the people in and around it disappeared.

CIRCUITS AND GEARS

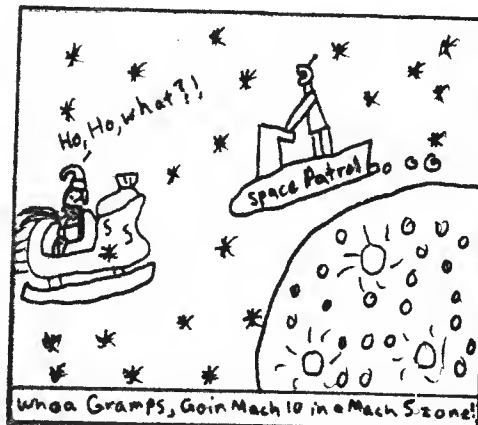

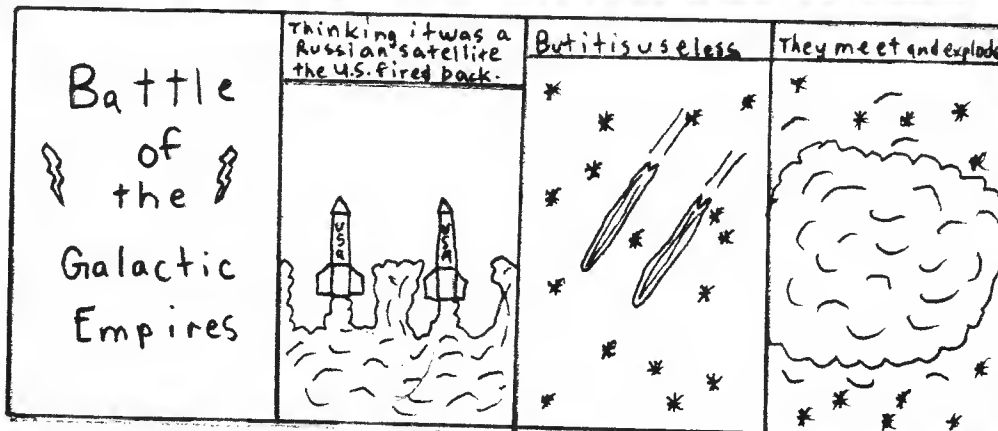

BITS OF SCIENCE FICTION INFORMATION

STAR WARS!!!

Yes fans, the greatest science fiction movie of them all is being rereleased again. It will only be here for 2 weeks so if you want to see it you better hurry. It comes out Friday and is scheduled to start by saying: Star Wars Episode IV A New Hope like it was supposed to have when it first came out. Plus, if you send your ticket stub to Kenner products, they will send you a dollar in the mail!

The staff apologizes for this issue being late. This is the March issue, and the April issue will be out shortly with a cover story on the fantasy game Dungeons and Dragons.

Games.....Chad Bunch
